

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY JUNE 28, 2003 - 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 102 new fires reported. Two new large fires were reported, one each in Southern California and in Northern California Areas. Two large fires were contained, one each in Southern California and Northern California. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Nevada, New Mexico, Oklahoma, Oregon, Texas and Utah.

On June 26th, a firefighter from the Animas Volunteer Fire Department was fatally injured in a vehicle accident while responding to the Jenny Fire on the Gila National Forest. The entire fire community sends condolences to friends and family of the deceased.

SOUTHWEST AREA LARGE FIRES:

MONTANO, Bernalillo District, New Mexico State. A Type 1 Incident Management Team (Sexton) has been assigned. This fire is burning in Bosque State Park, five miles northwest of downtown Albuquerque, NM. The Atrisco and Montano fires are combining resources and acreage. Fire behavior observed was creeping and smoldering. Crews continue to mop up.

ASPEN, Coronado National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is burning in mixed conifer, ponderosa pine and brush, 17 miles northeast of Tucson, AZ near Mount Lemmon. Fire behavior observed was some group torching, short range spotting, and smoldering. Crews continue to burnout, hold, and mop up on the north and northwest portion of the fire.

JENNY, Gila National Forest. A Type 2 Incident Management Team (Mullinex) is assigned. This lightning caused fire is burning in mixed conifer, pinyon pine, grass and oak, 18 miles northwest of Truth or Consequences, NM. Low to moderate fire behavior was observed. Crews continue to build and strengthen fireline.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Goheen) will transition with Fire Use Management Team (Ducan) today. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore and Moonshine fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish multiple resource objectives. Efforts continue to protect critical threatened and endangered habitats within the complex.

HELEN'S 2, Saguaro National Park. A Type 2 Incident Management Team (Raley) is assigned. This lightning caused fire is 23 miles east of Tucson, AZ. Moderate surface fire with isolated torching was observed. Crews continue to hold and to hot spot on the north and northeast sections of the fire.

POWELL, Grand Canyon National Park. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use fire is burning in timber with heavy ground fuels, 23 miles northwest of Grand Canyon Village, AZ. Fire activity, smoke parameters, and weather will continue to be monitored. No significant change occurred.

SECO, Gila National Forest. A Type 2 Incident Management Team (Bradley) is assigned. Objective of fire management have changed to containment strategy. This fire is burning in mixed conifer, grass and oak, 15 miles southwest of Winston, NM. Moderate fire behavior was observed.

MONUMENT, Las Vegas District, New Mexico State. This fire is burning in mixed conifer and oak, eight miles northeast of Fort Union National Monument, NM. Crews will continue to patrol and mop up along the fire perimeter.

SOUTHERN CALIFORNIA LARGE FIRES

SAWMILL, Kern County Fire Department. A Type 2 Incident Management Team (Dietrich) has been ordered. Unified command between Kern County Fire Department and Bakersfield Bureau of Land Management is in place. This fire is burning in chaparral, three and one quarter miles north of Lake Isabella, CA. Fire behavior observed was spotting due to erratic winds in and around structures.

OUTLOOK:

Weather Discussion: High pressure will be in place today over most western states, with very warm temperatures and low afternoon humidity values. However, a front will arrive late in the day in the Pacific Northwest. There may be enough moisture ahead of this front to trigger isolated thunderstorms in far western parts of the Northwest Area in the late afternoon and early evening. Across the rest of the west, winds will be mainly terrain driven, with no large storm system in the region. Instability will cause more thunderstorms today across the Southwest with dry thunderstorms possible along and west of the Continental Divide. In Alaska, high pressure will continue to build over the northeast corner and scattered wet thunderstorms are still possible over higher elevations in the east and toward the Yukon Flats.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA Interior, partly cloudy with scattered to isolated showers.	65 to 80.	28 to 45%.	Variable to southwest 5 to 10 mph.
SOUTHWEST AREA Mostly sunny and dry in Arizona and northwest New Mexico, except a slight chance of afternoon thunderstorms in far southeast Arizona. Partly to mostly cloudy with a chance of thunderstorms in southern and eastern New Mexico and west Texas; dry lightning is possible west of central New Mexico mountains.	70s and 80s mountains, 100 to near 117 lower elevations.	5 to 15% in Arizona and northwest New Mexico, 15 to 25% north central to southwest New Mexico, and 35% or more eastern New Mexico and west Texas.	Southwest to northwest winds 5 to 15 mph in Arizona and northwest half of New Mexico, with a few gusts to 20 mph on the Mogollon Rim. South to southeast winds 5 to 15 mph for the southeast half of New Mexico and west Texas.
ROCKY MOUNTAIN AREA Partly cloudy. Isolated to scattered thunderstorms for eastern Wyoming, eastern Colorado, Kansas, Nebraska, and South Dakota. Continued dry for western Colorado and western Wyoming.	80 to 90, except 65 to 75 mountains.	Less than 20% western and southern Colorado and southern Wyoming. 20 to 30% elsewhere.	Variable 5 to 15 mph.
NORTHERN CALIFORNIA AREA Mostly clear skies. 10% chance of a few thunderstorms with little rain in the eastern areas, east of the Cascade/Sierra crest. Some morning fog along the coast.	A bit cooler than Friday. 62 to 77 near the coast, 92 to 105 lower inland elevations.	10 to 22% inland and 35 to 55% near the coast.	Mostly northeast to east winds 5 to 10 mph in the morning, becoming mostly up slope/canyon in the afternoon at less than 8 mph.

<p>SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog for the coastal areas, otherwise mostly sunny.</p>	<p>80 to 100 mountains. 95 to 110 valleys. 95 to 105 upper desert. 105 to 115 low desert.</p>	<p>5 to 15% mountains and deserts. 10 to 20% valleys.</p>	<p>Southwest to northwest 5 to 15 mph.</p>
<p>EASTERN GREAT BASIN AREA Mostly sunny region-wide.</p>	<p>Idaho, Bridger-Teton, northern half Utah 65 to 80 in the mountains, 80 to 95 valleys. Southern Utah and Arizona Strip: 75 to 101.</p>	<p>Idaho, Bridger-Teton, northern half Utah 15 to 35% mountains, 9 to 20% valleys. Southern half Utah and Arizona Strip 3 to 20%.</p>	<p>Variable winds 5 to 15 mph.</p>
<p>WESTERN GREAT BASIN AREA A ridge of high pressure is providing mostly sunny and dry conditions. A weak area of instability will trigger a few areas of convection, and there is a slight chance of isolated dry thunderstorms in the afternoon.</p>	<p>In the north, mid 80s to upper 90s at low elevations, 70s to upper 80s in higher elevations. In the south 90s to 102 at low elevations and in the 80s to low 90s at higher elevations.</p>	<p>4 to 10% lower elevations, 8 to 18% higher elevations, 15 to 25% in the Sierras.</p>	<p>Mostly upslope/up canyon winds 3 to 8 mph with areas of southwest to northwest winds 10 to 15 mph.</p>

COMMUNICATIONS

Effective communication is a critical backbone of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
 - Knowledge of the radio issued to the individuals
 - Net control, frequencies
 - Line-of-sight restrictions
 - Antenna polarization effect (direction of the antenna)
 - Minimizing noise interference

- How can you mitigate potential problems?
 - Implement effective communication procedures--be brief, clear, concise, and to-the-point.
 - Give a good comprehensive briefing (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.).
 - Confirm that relayed information is received, acknowledged, and understood.
 - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).
 - Establish emergency check-in procedures.
 - Provide a minimum of 4 radios per 20-person firefighter crew.

- The Five Communication Responsibilities for All Firefighters
 - Brief others
 - Debrief your actions
 - Communicate hazards to others
 - Acknowledge messages
 - Ask if you don't know
